

An Organic Soil Amendment Formulated
to Produce Beautiful, Healthy Roses

ROSE DOKTOR

Rose Doktor is a specific blend of gypsum, 8-2-3 vegetable fertilizer and zeolite. All of these ingredients are necessary for the production of strong, healthy roses. The gypsum, which is naturally occurring, contains the micro and macronutrients: calcium, sulfur,

magnesium, iron, potassium, sodium, and trace elements of manganese, zinc, and copper. All of these ingredients will not only maximize plant cell growth, but will also increase the number of leaves, improve root growth, color vibrancy and increase flowering percentage. The 8-2-3 vegetable fertilizer, is ideal for all geographic locations. The zeolite is added for proper water retention and control, which is needed to maintain healthy plants. All of our approved organic products are made from 100% natural ingredients. Our products help to create healthy soil that is rich with microbial activity, humus, macronutrients and micronutrients, with strong texture and tilth to increase soil fertility and plant health.

Use and Application Rates:

Follow with heavy watering for best absorption.

Spread 1/2 cup of Rose Doktor around base of plant in early spring, mid-summer and again in early fall for deep green leaves and bright flowers.

A good foliar spray should be added during mid-season to assist in maximizing plant development.

A Specially Formulated Organic Soil
Amendment for Peppers and
Other Vegetables

“PEPPER UP”

Pepper Up is made up of naturally occurring gypsum and Epsom salts. The gypsum provides the essential balance of these micro and macronutrients: calcium, magnesium, sulfur, potassium, manganese, zinc, iron and copper. The naturally occurring Epsom salts provide the essential nutrients for plant health and increased cell wall strength which aids in the photosynthesis process for stronger plants and more vibrant color. All of our approved organic products are made from 100% natural ingredients. Our products help to create healthy soil that is rich with microbial activity, humus, macronutrients and micronutrients, with strong texture and tilth to increase soil fertility and plant health.

Use and Application Rates:

Follow with heavy watering for best absorption.

Apply 1 scoop of **Pepper Up** at the base of plants during initial budding. When vegetables begin to mature, apply a second scoop of **Pepper Up**.

The Organic Farm Store

located in the beautiful Pacific Northwest, is proud to bring you high quality products made only from all natural ingredients. We develop innovative, environmentally friendly, natural and organic products that are safe for the whole family.

From our “Close to Naturenow™” pet product line, to our Bath & Body line and our soil amendments and organic fertilizers, you’ll feel good about using our products.

It is our goal to provide our customers with the highest quality, natural products available and to continue to develop innovative, earth-friendly products.

The Organic Farm Store, established in 1998, is a family owned and operated business. As a family we have made a commitment to natural living for our health and the health of the planet.

Please contact us for more information on available sizes.

An All-Purpose Organic Fertilizer for Perennials, Annuals and Lawns

An All-Purpose Organic Soil Amendment for Evergreen Trees and Shrubs

An All-Purpose Organic Soil Amendment

An All-Purpose Organic Soil Amendment for Deciduous or Leaf-Bearing Trees

WILD THING

Wild Thing is an **all-natural organic fertilizer** ideal for perennials, annuals and lawns. It is a blend of gypsum and 8-2-3 vegetable fertilizer. The gypsum is naturally occurring and self-prilling and contains the following micronutrients: calcium, sulfur, magnesium, iron, potassium, sodium, and other trace elements.

The 8-2-3 vegetable fertilizer, which is ideal for all geographic locations and is both Washington state and OMRI approved. It naturally provides

nitrogen, phosphate and potassium, which are needed to maintain healthy plants. All of our approved organic products are made from 100% natural ingredients. Our products help to create healthy soil that is rich with microbial activity, humus, macronutrients and micronutrients, with strong texture and tilth to increase soil fertility and plant health.

Use and Application Rates:

Follow with heavy watering for best results.

Perennials:

New Plants: Add 2 Tbsp to soil in bottom of hole and mix with soil when transplanting seedlings.

Established Plants: Spread 1/2 cup evenly around base of plant in early Spring and again in late Summer for vigorous plants with healthy blossoms.

Annuals:

Sprinkle 4 cups per 100 sq. ft. of flower bed and mix with existing soil prior to planting annuals. Sprinkle again in mid summer for sturdy plants and continued blossoming.

SPRUCE UP

Spruce Up is a specific blend of ingredients that facilitates the improvement of soil conditions for proper root development and growth of evergreen trees and shrubs. All plants and trees require adequate mineral nutrients, which are essential in completing their life cycles.

Spruce Up is made up of gypsum, soybean meal, zeolite and additional organic matter. The gypsum provides the essential balance of these micro and macronutrients: calcium, magnesium, sulfur, potassium, manganese, zinc and copper. The soybean meal is added for its NPK value of nitrogen phosphate and potassium. The zeolite and additional organic matter provide water retention and control abilities that are necessary in maintaining healthy plants and trees. All of our approved organic products are made from 100% natural ingredients. Our products help to create healthy soil that is rich with microbial activity, humus, macronutrients and micronutrients, with strong texture and tilth to increase soil fertility and plant health.

Use and Application Rates:

Follow with heavy watering for best absorption.

Application is required twice per year, once in spring and again in early fall.

Mature Trees and Shrubs:

Spread 4 cups of **Spruce Up** from the base of the tree out to the drip line.

Younger Trees, Shrubs and/or Seedlings:

Apply 2 cups directly around base of plant.

CLAY DOKTOR

Clay Doktor maximizes plant cell growth, increases number of leaves, improves root growth and

improves flowering percentage. All plants require adequate mineral nutrients, which are essential for the plant to complete its life cycle. These essential minerals are nitrogen, sulfur, phosphorous, calcium, potassium

magnesium, boron manganese, zinc, copper, molybdenum, and chlorine. **Clay Doktor** contains seven of these essential elements in adequate amounts to promote good plant development.

Clay Doktor when used as a soil amendment produces the following benefits:

- reduces soil alkalinity
- increases the efficiency of NPK fertilizers used on plants

Clay Doktor contains 80% gypsum equivalent. No additives are used in the pelletizing process resulting in its approval - **"For Use in Organic Food Production."**

Composition:

Calcium Sulfate Dehydrate	82.0%
Magnesium Sulfate Heptahydrate	13.4%
Trace Elements	4.6%

Analysis (water soluble)

Major Elements

Calcium (Ca)	19.1%
Magnesium (Mg)	1.4%
Sulfur (S)	15.6%
Potassium (K)	0.8%

Trace Elements

Manganese	160 ppm
Zinc (Zn)	41.5 ppm
Copper (Cu)	8.0 ppm

Use and Application Rates:

For each 4" Planting Pot and/or 4" planting area: Add 1 scoop of **Clay Doktor** each week. Water well.

TREE AWAKE

Tree Awake is specifically blended to facilitate the improvement of soil conditions for proper root development and growth of deciduous or leaf-bearing trees for clay enriched soils. All plants and trees require adequate mineral nutrients, which are essential in completing their life cycles.

Tree Awake is made up of naturally occurring Epsom salts and gypsum. The naturally occurring Epsom salts provide the essential nutrients for plant health and increased cell wall strength which aids in the photosynthesis process for stronger and more vibrant leaf color. The gypsum provides the essential balance of these micro and macronutrients: calcium, magnesium, sulfur, potassium, manganese, zinc, iron and copper. All of our approved organic products are made from 100% natural ingredients. Our products help to create healthy soil that is rich with microbial activity, humus, macronutrients and micronutrients, with strong texture and tilth to increase soil fertility and plant health.

Use and Application Rates:

Follow with heavy watering for best absorption.

Application is required once in early spring and again in early summer.

Mature Trees:

Apply 2 cups of **Tree Awake** at the drip line to mature trees and shrubs.

Younger Plants and/or Seedlings

Apply 1 cup directly at the base of the plant.
